PROFESSIONAL SUMMARY

Lead Mobile Developer with 7+ years of experience in Android (Java/Kotlin) and Flutter (Dart) application development. Skilled in building scalable mobile applications, integrating REST APIs, and managing the full development lifecycle from requirement gathering to deployment. Currently leading a team of developers while actively contributing to architecture design, feature development, and successful project delivery.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart, C#

Framework: Flutter SDK, Android SDK, Node.js, ASP.NET Core Web API, .Net Core

Database: SQLite, MS SQL Server

Tools: Android Studio, VS Code, GitLab, GitHub Desktop, SQL Server Management Studio, SVN, Postman, Zeplin, Figma

Tech and Libraries: MVVM, State Management (BLoC, GetX, Riverpod), Clean Architecture, Repository Pattern, Shared Preferences, Secure Storage, RESTful APIs, JSON, Firebase Cloud Messaging, Firebase Crashlytics, EventBus, Google Maps SDK, Retrofit, Volley, Android Jetpack, Data Binding, AdMob, Encryption & Decryption, ECG Device Integration, Payment Gateway Integration, S3 Bucket

---

LEADERSHIP SKILLS

Requirement Gathering, Stakeholder Communication, Agile Methodology, Sprint Planning, Effort Estimation, Cross-functional Coordination, Code Reviews, Play Store and App Store Deployment, Performance Optimization

---

EXPERIENCE

- HealthIndia Insurance TPA Services (Jan 2020 – Present)
  Senior Flutter Developer & Team Lead

- Joapa Digital Secutech Pvt Ltd (August 2018 – Dec 2019)

RESPONSIBILITIES

- Worked as a hands-on developer while leading a team of 5 mobile developers, managing task allocation, code reviews, and sprint delivery.
- Participated in requirement gathering with Operations and business teams, translating needs into technical solutions.
- Collaborated with backend teams to integrate REST APIs and ensure data validation.
- Developed and maintained Android (Java/Kotlin) and Flutter (Dart) application modules.
- Performed debugging, fixing, and root cause analysis to ensure stability and performance.
- Managed GitLab repositories including branching strategy, merge requests, and version control
- Provided project updates, tracked timelines, and reported delivery status to management.

PROJECTS

Local Train Ticketing System (Academic): Local Train Ticketing System (LTTS) is an Android app which sets up online communication between a user's and railway system. LTTS allows user to book their tickets online. This will help user to getting tickets without wasting time in long queue which will save the time and papers and maintain history of bookings.

Home Visit App (Android - Java)
Internal application for field phlebotomist.

- Implemented offline data storage with automatic sync when network is available.
- Integrated ECG devices for capturing medical reports.
- Enabled digital signature capture, image upload, and form submission.
- Designed local database and file storage structure to handle no network scenarios.

MEDI-FACE (Flutter - Dart)
Play Store: https://play.google.com/store/apps/details?id=health.india.pims&hl=en_IN

- Application for diagnostic centres to manage appointments and reports.
- Implemented document uploads with geotagging, case history tracking, and support features.
- Integrated APIs for real-time data management and updates

HealthieU (Flutter - Dart)
Play Store: https://play.google.com/store/apps/details?id=com.wyh.bsideu

- Wellness and insurance support application.
- Integrated claim tracking and service modules.
- Payment Gateway integration.

MediRRConnect (Android - Kotlin)
Play Store: https://play.google.com/store/apps/details?id=health.india.pims.medi_rrconnect

- Appointment booking application for LIC RR users.
- Implemented form submission, admin tracking, and productivity reports.

Kooky Food Service - Backend (Freelance Project) (Node.js, Express.js, MySQL, JWT, VS Code)

- Designed and developed backend architecture for a food delivery platform similar to Zomato.
- Developed REST APIs for Admin, Customer, Restaurant, and Delivery modules.
- Designed database schema and managed data flow between modules.
- Implemented file handling and structured storage system.
- Managed server hosting and deployment for all modules.
- Payment Gateway integration.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology| University of Mumbai| 2017

LANGUAGES: English, Hindi, Marathi
PLACE: Mumbai, Maharashtra.
